Chapter 1	General introduction and outline of thesis	7
<i>Part I</i>		
<i>Optimizing current treatments</i>		
Chapter 2	Mortality reduction by vitamin D receptor activation in end stage renal disease: A commentary on the robustness of current data	33
Chapter 3	“Real world” use of cinacalcet for the management of secondary hyperparathyroidism in The Netherlands: Analysis of data from the European ECHO observational study	45
Chapter 4	“Real-World” Use of Cinacalcet for Managing SHPT in Different European Countries: Analysis of Data from the ECHO Observational Study	65
Chapter 5	Serum phosphate reduction in dialysis patients treated with cinacalcet for secondary hyperparathyroidism results mainly from parathyroid hormone reduction	87
<i>Part II</i>		
<i>Delineating future treatment directions</i>		
Chapter 6	Fibroblast growth factor 23 and klotho in chronic kidney disease	117
Chapter 7	Determination of fibroblast growth factor 23 (FGF-23)	135

Chapter 8	Effects of dietary phosphate and calcium intake on Fibroblast Growth Factor-23	145
Chapter 9	Fibroblast Growth Factor 23 is Associated with Proteinuria and Smoking in Chronic Kidney Disease: An analysis of the MASTERPLAN cohort	167
Chapter 10	Cross talk between the renin-angiotensin-aldosterone system and vitamin D-FGF-23-klotho in chronic kidney disease	189
Chapter 11	Summary and future perspective	207
Chapter 12	Nederlandse samenvatting voor niet-ingewijden	217
Chapter 13	Dankwoord	225
