

## **X-linked creatine transporter deficiency**

Jiddeke Matuja van de Kamp

**Reading committee:**

prof.dr.ir. C.A.J.M. Jakobs (VU University Medical Center, Amsterdam)

prof.dr. M.S. van der Knaap (VU University Medical Center, Amsterdam)

dr. T.J. de Koning (University Medical Center Groningen, Groningen)

dr. T. Kleefstra (Radboud University Medical Center, Nijmegen)

dr. E.A. Sistermans (VU University Medical Center, Amsterdam)

ISBN: 978-94-6259-059-5

Cover design: brain taken from the *Starry Night*, oil on canvas, by Vincent van Gogh, 1889, Museum of Modern Art, New York. Van Gogh's use of complementary colors is based on the color theory of Chevreul,<sup>1</sup> the famous French chemist who also discovered and named creatine.

Lay-out: Ilse Stronks

Printed by: Ipskamp drukkers BV, Enschede

Financial support for the publication of this thesis was kindly provided by the departments of Clinical Genetics and Clinical Chemistry, VU University Medical Center, Amsterdam and MRC-Holland.

VRIJE UNIVERSITEIT

# X-linked creatine transporter deficiency

ACADEMISCH PROEFSCHRIFT

ter verkrijging van de graad Doctor aan  
de Vrije Universiteit Amsterdam,  
op gezag van de rector magnificus  
prof.dr. F.A. van der Duyn Schouten,  
in het openbaar te verdedigen  
ten overstaan van de promotiecommissie  
van de Faculteit der Geneeskunde  
op vrijdag 7 maart 2014 om 11.45 uur  
in de aula van de universiteit,  
De Boelelaan 1105

door

Jiddeke Matuja van de Kamp

geboren te Leiden

promotoren: prof.dr. E.J. Meijers-Heijboer  
prof.dr. G.S. Salomons  
copromotor: dr. G.M.S. Mancini

*Chercher toujours l'infaillibilité, sans avoir la prétention de l'atteindre jamais*

Motto of M.Chevreul<sup>1</sup>

Voor mijn vader

<sup>1</sup> Nature Sept. 19, 1872, p.420

## CONTENTS

<b>CHAPTER 1: General introduction</b>	9
1.1 A short history of creatine	10
1.2 Aims of this thesis	13
<b>CHAPTER 2: Creatine transporter deficiency in male patients</b>	19
2.1 Phenotype and genotype in 101 male patients with X-linked creatine transporter deficiency	21
2.2 Genotype-phenotype correlation of contiguous gene deletions of <i>SLC6A8</i> , <i>BCAP31</i> and <i>ABCD1</i>	49
2.3 Long-term follow-up and treatment in nine boys with X-linked creatine transporter deficiency	67
<b>CHAPTER 3: Females heterozygous for creatine transporter deficiency</b>	87
3.1 Clinical features and X-inactivation in females heterozygous for creatine transporter deficiency	89
3.2 Detection of low-level somatic and germline mosaicism by denaturing high-performance liquid chromatography in a EURO-MRX family with <i>SLC6A8</i> deficiency	109
<b>CHAPTER 4: Pathogenesis of creatine transporter deficiency</b>	127
4.1 New insights into creatine transporter deficiency: the importance of recycling creatine in the brain	129
4.2 A review of X-linked creatine transporter deficiency: clinical aspects and pathophysiology	135
<b>CHAPTER 5: Conclusion</b>	175
5.1 Summary	176
5.2 Future perspectives	179
Samenvatting	184
List of publications	189
Dankwoord	192
Curriculum vitae	193
