

# Table of contents

**Preface**

**Chapter 1 General introduction**

**Chapter 2 Phenotyping multiple sclerosis; clinical relevance of combining MRI features of inflammation and degeneration**

**Chapter 3 Heterogeneity of cortical remyelination in multiple sclerosis**

**Chapter 4 Heterogeneity of cortical lesions in multiple sclerosis: clinical and pathological implications**

**Chapter 5 Glutamate gene polymorphisms predict brain volumes in multiple sclerosis**

**Chapter 6 Histone deacetylase gene variants predict brain volume changes in multiple sclerosis.**

**Chapter 7 Summarizing discussion**

**Chapter 8 Appendix – Supplementary material for chapters 5 & 6**

**Abbreviations**

**Author affiliations**

**Nederlandse samenvatting**

**Curriculum Vitae**

**Bibliography**

**Dankwoord**
