

# Table of contents

<b>Chapter 1</b>	General Introduction	9
<b>Chapter 2</b>	The mannose cap of mycobacterial lipoarabinomannan does not dominate the Mycobacterium-host interaction	29
<b>Chapter 3</b>	C-type lectin DC-SIGN modulates Toll-like receptor signaling via Raf-1 kinase-dependent acetylation of transcription factor NF-kappaB	61
<b>Chapter 4</b>	Carbohydrate-specific signaling through dynamic regulation of the DC-SIGN signalosome directs immunity to mycobacteria, HIV-1 and Helicobacter pylori	87
<b>Chapter 5</b>	Dectin-1 directs T helper cell differentiation by controlling noncanonical NFkappaB activation through Raf-1 and Syk	111
<b>Chapter 6</b>	Leukocyte-specific protein 1 is essential for phagocytosis of Candida albicans by Dectin-1 on human macrophages	141
<b>Chapter 7</b>	Discussion	155
	Nederlandse samenvatting voor niet-ingewijden	185
	Dankwoord	190
	Curriculum Vitae	192
	List of publications	193
	Supplementary figures	on CD
