

**Client-centred practice  
in  
occupational therapy**

Isaline Eijssen

This thesis was prepared within the department of Rehabilitation Medicine / Occupational Therapy and the EMGO Institute for Health and Care Research of the VU University Medical Center.

The studies presented in this thesis were supported by a grant from the Stichting MS Research - the Dutch MS Research foundation and ZonMw - the Netherlands Organisation for Health Research and Development.

Financial support for the printing of this thesis has been kindly provided by Ergotherapie Nederland - the Dutch association of Occupational Therapy and by the Stichting MS Research.
