

Contents

Chapter 1	
General introduction (partly published, <i>Cancers</i> , 2011)	9
Chapter 2	
Characterization of murine MGL1 and MGL2; Distinct glycan-specificities and tumor binding properties (<i>Molecular Immunology</i> , 2009)	33
Chapter 3	
Glycan modification of antigen to enhance Th1 skewing and induction of CD8 T-cells through cross presentation (submitted for publication)	45
Chapter 4	
Cross-talk between MGL-1 and TLR4 abolishes Lewis ^x -induced cross-presentation (manuscript in preparation)	73
Chapter 5	
Tumour-associated glycan-modifications of antigen enhance MGL2-dependent uptake and MHC-class I restricted proliferation (<i>International Journal of Cancer</i> , 2011)	91
Chapter 6	
Design of neo-glycoconjugates that target Mannose Receptor and enhance TLR-independent cross-presentation (<i>European Journal of Immunology</i> , 2011)	107
Chapter 7	
General discussion (partly published, <i>Cancers</i> , 2011)	121
Appendices	
Englisch summary for laymen	142
Nederlandse samenvatting voor niet-ingewijden	145
Curriculum vitae	149
Dankwoord	150
