

CONTENTS

Chapter 1	Introduction and outline of thesis	9
PART I	Haemostatic devices used during laparoscopy to prevent bleeding and related complications	17
Chapter 2	Perioperative outcomes using LigaSure compared to conventional bipolar instruments in laparoscopic salpingo-oophorectomy: a randomized controlled trial <i>Surg Endosc.</i> 2012; 26(10): 2884-2891	19
Chapter 3	Perioperative outcomes using LigaSure compared to conventional bipolar instruments in laparoscopic hysterectomy: a randomised controlled trial <i>BJOG.</i> 2011; 118(13): 1568-1575	33
Chapter 4	Effectiveness of the electrothermal bipolar vessel sealing devices versus other electrothermal and ultrasonic devices for abdominal surgical haemostasis: a Systematic Review <i>Surg Endosc.</i> 2012; 26(10): 2892-2901	49
PART II	Recommendations to prevent ureteral injuries during laparoscopic hysterectomy based on predisposing factors	65
Chapter 5	Prevention of ureteral injuries during laparoscopic hysterectomy: a systematic review of the literature to identify effective strategies <i>Submitted</i>	67
Chapter 6	Recommendations to prevent urinary tract injuries during laparoscopic hysterectomy: a systematic Delphi procedure among experts <i>J Minim Invasive Gynecol.</i> 2011; 18(3): 314-321	89
Chapter 7	Causes and prevention of laparoscopic ureter injuries: an analysis of 31 cases during laparoscopic hysterectomy in the Netherlands <i>Surg Endosc.</i> 2013; 27(3): 946-956	105
Chapter 8	General discussion and future perspectives	123

Chapter 9	Summary	
	Nederlandse samenvatting	139
Addendum	List of co-authors	153
	List of publications	155
	Curriculum Vitae	157
	Dankwoord	159
