

# Contents

## **Chapter 1: General introduction**

1.1 Multiple sclerosis	10
1.2 Genetics	10
1.3 Environmental factors	10
1.4 Neuropathology	10
1.5 Grey matter pathology in a 'white matter disease'	12
1.6 Neurodegeneration	15
1.7 Aims and outline of thesis	15

## **Chapter 2: Cortical pathology, meninges and clinical features in MS**

2.1 Meningeal inflammation is not associated with cortical demyelination in chronic multiple sclerosis	23
2.2 Abundant extracellular myelin in the meninges of patients with multiple sclerosis	37
2.3 Heterogeneity of cortical lesions in multiple sclerosis: clinical and pathologic implications	55

## **Chapter 3: Hippocampal pathology in MS**

3.1 Cholinergic imbalance in the multiple sclerosis hippocampus	71
3.2 Should cholinesterase inhibitors be abandoned as a treatment for cognitive decline in MS?	87

## **Chapter 4: Gene expression analyses on MS lesions: working towards pathogenesis?**

4.1 Upregulation of immunoglobulin-related genes in cortical sections from multiple sclerosis patients	93
4.2 Pathway analysis of microRNA expression in multiple sclerosis lesions	109

## **Chapter 5: Cortical lesion detection with MRI techniques**

5.1 Imaging the tip of the iceberg: visualisation of cortical lesions in multiple sclerosis	131
5.2 Post-mortem verification of MS cortical lesion detection with 3D DIR	145

## **Chapter 6: Summary, general discussion and future perspectives and conclusion**

6.1 Summary	158
6.2 General discussion and future perspectives	161
6.3 Concluding remarks	168
