

Simultaneous EEG and functional MRI

A noninvasive tool in the presurgical evaluation of focal epilepsy

The research presented in this thesis was financially supported by the Dutch Epilepsy Foundation (grant no. 07-16) and by the Central Nervous System and Imaging (CSI) project. The CSI project has received funding from the ENIAC Joint Undertaking (grant no. 120209) and from the national programs/funding authorities of Austria, Hungary, Italy, and the Netherlands.

Financial support for the publication of this thesis was kindly provided by the department of Research and Development of Kempenhaeghe, VU University Amsterdam, Nationaal Epilepsie Fonds, Philips Healthcare, ANT neuro bv., and UCB Pharma BV.

This text was typeset by the author using L^AT_EX 2_ε and Memoir.
