

Table of contents

1. Introduction	7
2. Effector memory T cell frequencies in relation to tumour stage, location and HPV status in HNSCC patients	23
3. Exploring dendritic cell based vaccines targeting survivin for the treatment of head and neck cancer patients	41
4. Generating HPV specific T helper cells for the treatment of HPV induced malignancies using TCR gene transfer	65
5. Immunotherapy for head and neck cancer patients: shifting the balance	89
6. Increased cytotoxic capacity of tumor antigen specific human T cells after <i>in vitro</i> stimulation with IL21 producing dendritic cells	115
7. IL-21 promotes the expansion of CD27 ⁺ CD28 ⁺ tumor infiltrating lymphocytes with high cytotoxic potential and low collateral expansion of regulatory T cells	135
8. IL-21 in cancer immunotherapy	157
9. Clinical Effects of Adjuvant Active Specific Immunotherapy Differ between Patients with Microsatellite-Stable and Microsatellite-Instable Colon Cancer	165
10. Extent and location of tumor infiltrating lymphocytes in micro-satellite stable colorectal cancer predicts outcome to adjuvant Active Specific Immunotherapy	183
11. ASI trial for colorectal cancer patients	209
12. Future perspectives	215
13. Appendices	219
