

Saskia Vosslamber

The Type I Interferon System in Autoimmune Disease

#### About the Cover

The picture on the cover is taken inside a 'luminarium', an inflatable, dazzling maze of winding paths and soaring domes in which light and colour melt together in a beautiful way. The maze, with a myriad of opportunities, symbolizes the choices that patients and physicians face in the treatment of autoimmune diseases. The unknown destination of the chosen path is like the unknown outcome of treatment. The research addressed in this thesis provides guidance on the path to proceed.

Photography and cover design by Tineke van der Pouw Kraan.
