

CONTENT

	General introduction and outline of the thesis	10
Part I	Techniques in minimally invasive esophagectomy for cancer	
Chapter 1	Laparoscopic versus open transhiatal resection for distal and junction cancer.	20
Chapter 2	Cervical or thoracic anastomosis after esophagectomy for cancer: a systematic review and meta-analysis.	34
Chapter 3	Minimally invasive intrathoracic anastomosis after Ivor Lewis esophagectomy for cancer. A review of transoral or transthoracic use of staplers.	48
Chapter 4	Technique and short-term outcome of minimally invasive Ivor Lewis esophageal resection for distal esophageal and gastroesophageal junction cancers.	64
Part II	A randomized trial	
Chapter 5	Preliminary experience of minimally invasive esophagectomy for cancer.	80
Chapter 6	Minimally invasive versus open esophagectomy for patients with esophageal cancer: a multicentre, open-label, randomized controlled trial.	90
Chapter 7	Quality of life after minimally invasive and open esophagectomy: results of a randomized trial.	106
Part III	Impact of minimally invasive esophagectomy	
Chapter 8	Immunological changes after minimally invasive or conventional esophageal resection for cancer: a randomized trial.	124
Chapter 9	The cost-effectiveness of minimally invasive esophagectomy for esophageal cancer, a cost analysis of a randomized controlled trial.	140
