

Contents

Chapter 1:	General Introduction: targeting myeloid suppression in cancer immunotherapy <i>Immunotherapy. 2011, 3:77-96</i>	9
Chapter 2:	IL-10 conditioning of human skin affects the distribution of migratory dendritic cell subsets and functional T cell differentiation <i>PLoS One. 2013 Jul 18;8(7).</i>	39
Chapter 3:	Induction of dendritic cell maturation in the skin microenvironment by soluble factors derived from colon carcinoma <i>Hum Vaccin Immunother. 2014 Apr 14;10(6).</i>	65
Chapter 4:	Characterization of four conventional Dendritic Cell subsets in human skin-draining lymph nodes in relation to T cell activation <i>Blood. 2011 Sep 1;118(9):2502-10</i>	85
Chapter 5:	Selective transduction of mature DC in human skin and lymph nodes by CD80/CD86-targeted fiber-modified Adenovirus-5/3 <i>J Immunother. 2009 Nov-Dec;32(9):895-906.</i>	105
Chapter 6:	Functional characterization of a STAT3-dependent dendritic cell-derived CD14 ⁺ cell population arising upon IL-10-exposed maturation <i>Oncoimmunology. 2013 Apr 1;2(4):e23837</i>	127
Chapter 7:	Glycogen Synthase Kinase-3 β as a key regulator of human dendritic cell development and suppression <i>Submitted for publication</i>	153
Chapter 8:	Summarizing Discussion and Future Prospects: <i>Front Immunol. 2013 Nov 25;4:403.</i>	175
	Samenvatting	195
	Dankwoord	203
	About the author	207
	List of publications	211
