

TABLE OF CONTENTS

Chapter 1. General introduction	9
Chapter 2. The thalamus	25
2.1 Clinical significance of atrophy and white matter mean diffusivity within the thalamus of multiple sclerosis patients	27
2.2 Thalamic tract integrity changes are associated with cognition and disinhibition in multiple sclerosis	41
2.3 Thalamus structure and function determine severity of cognitive impairment in multiple sclerosis	57
Chapter 3. The hippocampus	77
3.1 Structural and functional hippocampal changes in multiple sclerosis patients with intact memory function	79
3.2 Functional adaptive changes within the hippocampal memory system of patients with multiple sclerosis	99
3.3 Memory impairment in multiple sclerosis: relevance of hippocampal activation and hippocampal connectivity	121
Chapter 4. The dorsolateral prefrontal cortex	135
4.1 Functional correlates of cognitive dysfunction in multiple sclerosis: A multicenter fMRI study	137
4.2 rTMS affects brain activation, functional connectivity and working memory performance in multiple sclerosis patients	165
Chapter 5. Understanding cognitive impairment	187
5.1 Cognitive impairment in MS: impact of white matter integrity, gray matter volume, and lesions	189
5.2 Indicators for cognitive performance and subjective cognitive complaints in multiple sclerosis: a role for advanced MRI?	207
Chapter 6. Summary, general discussion and future perspectives	215
Nederlandse samenvatting	237
Dankwoord	243
List of publications	251
Curriculum Vitae	257
