

## CONTENTS

<b>Chapter 1</b>	General introduction	9
<b>Chapter 2</b>	Broad expression of Toll-like receptors in the human central nervous system. <i>Journal of Neuropathology and Experimental Neurology, 2002</i>	31
<b>Chapter 3</b>	Different TLR agonists tend to elicit an immune-regulatory cytokine and chemokine phenotype in human microglia <i>submitted for publication</i>	49
<b>Chapter 4</b>	The effect of Toll-like receptor agonists on survival, differentiation and myelin formation by oligodendrocytes. <i>Manuscript in preparation</i>	71
<b>Chapter 5</b>	Toll-like receptor 3 on adult human astrocytes triggers production of neuroprotective mediators. <i>Glia, 2006</i>	89
<b>Chapter 6</b>	The identification of soluble CD14 as an endogenous agonist for Toll-like receptor 2 on human astrocytes by genome-scale functional screening of glial cell derived proteins. <i>Glia, 2007</i>	109
<b>Chapter 7</b>	The microtubule regulator stathmin is an endogenous protein agonist for Toll-like receptor 3. <i>submitted for publication</i>	129
<b>Chapter 8</b>	Toll-like receptors in the CNS: implications for neurodegeneration and repair. <i>Progress in Brain Research, 2009</i>	151
<b>Chapter 9</b>	General discussion	167
<b>Chapter 10</b>	Nederlandse Samenvatting	183
<b>Chapter 11</b>	Abbreviations	187
<b>Chapter 12</b>	Curriculum Vitae	191
<b>Chapter 13</b>	Dankwoord	195
<b>chapter 14</b>	Appendix	199
