

Economic evaluation of interventions  
for occupational health:

exploring methods & applied studies

The studies presented in this dissertation were conducted within the Unit of Health Technology Assessment and Department of Public and Occupational Health, both part of the EMGO Institute for Health and Care Research (EMGO+) ([www.emgo.nl](http://www.emgo.nl)). The EMGO+ participates in the Netherlands School of Primary Care Research (CaRe), which was re-acknowledged in 2005 by the Royal Netherlands Academy of Arts and Sciences (KNAW).

In this dissertation, part of the studies presented in chapters 2, 3 and 4 were financially supported by the Ministry of Social Affairs and Employment. The Dutch Health Insurance Executive Council (CVZ) financed the study described in chapter 5, grant DPZ no. 169/0. The Netherlands Organisation for Health Care Research and Development (ZonMw) and the Dutch College of General Practitioners (NHG) Common Diseases programme financed the study described in chapter 6, grant no. 4200.0003. The study presented in chapter 7 was conducted in the framework of Body@work, Research Centre Physical Activity, Work and Health, TNO-VU/VUmc.

Financial support for printing this dissertation was kindly provided by the VU University and the EMGO Institute for Health and Care Research (EMGO+).
