Breukers RM, de Wilde RB, van den Berg PC, Jansen JR, Faes TJ, Twisk JW, Groeneveld AB. Assessing fluid responses after coronary surgery: role of mathematical coupling of global end-diastolic volume to cardiac output measured by transpulmonary thermodilution. *Eur J Anaesthesiol.* 2009; 26: 954-960

Breukers RM, Willems JH, de Wilde R, Jansen JR, Groeneveld AJ. Less invasive indicators of changes in the modilution cardiac output by ventilatory changes after cardiac surgery. *Eur J Anaesthesiol.* 2009; 26: 863-867

Breukers RM, Groeneveld AB, de Wilde RB, Jansen JR. Transpulmonary versus continuous thermodilution cardiac output after valvular and coronary artery surgery. *Interact Cardiovasc Thorac Surg.* 2009; 9: 4-8

Breukers RM, Trof RJ, de Wilde RB, van den Berg PC, Twisk JW, Jansen JR, Groeneveld J. Relative value of pressures and volumes in assessing fluid responsiveness after valvular and coronary artery surgery. *Eur J Cardiothorac Surg.* 2009; 35: 62-68

Breukers RM, Seppehrkhoy S, Spiegelenberg SR, Groeneveld AB. Cardiac output measured by a new arterial pressure waveform analysis method without calibration compared with thermodilution after cardiac surgery. *J Cardiothorac Vasc Anesth.* 2007; 21: 632-635

De Wilde RB, Breukers RB, van den Berg PC, Jansen JR. Monitoring cardiac output using the femoral and radial arterial pressure waveform. *Anaesthesia.* 2006; 61: 743-746

Groeneveld ABJ, Breukers RBGE. Preload recruitability as a guide to fluid therapy in shock. In: Redl H (Ed) 11th Congress of the European Shock Society Medimond, pp 23-27

Breukers RB, Jansen JR. Pulmonary artery thermodilution cardiac output vs. transpulmonary thermodilution cardiac output in two patients with intrathoracic pathology. *Acta Anaesthesiol Scand.* 2004; 48: 658-661

Mercelina-Roumans PE, Breukers RB, Ubachs JM, van Wersch JW. Hematological variables in cord blood of neonates of smoking and nonsmoking mothers. *J Clin Epidemiol.* 1996; 49: 449-454

Mercelina-Roumans PE, Breukers RB, Ubachs JM, van Wersch JW. Cord blood cells and indices: smoking-related differences between the sexes. *Acta Paediatr.* 1995; 84: 371-374

Groeneveld ABJ, Breukers RMBG, Verheij J. Clinical value of intrathoracic volumes from transpulmonary indicator dilution. *Pinsky MR, Payen D, eds. Update in Intensive Care and Emergency Medicine. Functional Hemodynamic Monitoring.* Springer Verlag, Berlin 2004; pp 153-163

1 Breukers RMBGE, Trof RJ, Groeneveld ABJ. Cardiac filling volumes and pressures in
2 assessing preload responsiveness upon fluid challenges. *Vincent J.-L. ed. Yearbook of*
3 *Intensive Care and Emergency Medicine. Hemodynamic support.* Springer Verlag, Berlin
4 2009; pp 265-274
5 Houtman S, Bouwman RA, Coumou JW, Vonk Noordergraaf A, Breukers RM. Tension
6 pneumothorax after accidental aspiration. *Neth J Crit Care* 2009; 13: 142-144
7 Slagt C, Breukers RMBGE, Groeneveld ABJ. Choosing patient-tailored hemodynamic
8 monitoring. Accepted for publication in *Yearbook of Intensive Care and Emergency*
9 *Medicine* 2010 and in *Critical Care*

Rosemarie B.G.E., listening to the name Rose-Marieke, Breukers was born on November 24th 1967 in Waalwijk. She graduated from the Dr. Mollercollege, Waalwijk in 1986. In 1987 she started medical school at the Rijksuniversiteit Limburg in Maastricht. She finished her study spending a few months in Kenya. She received her medical degree in 1994 and started her internal medicine training in 1996 at the Westeinde Hospital (Head: Dr. E.J. Buurke en Dr. P.H. Geelhoed-Duijvestijn) and the Leiden University Medical Center (Head: Prof.Dr. A.E. Meinders). In 2001 she started her fellowship Intensive Care Medicine at the LUMC (Head: Prof.Dr. P.C.M. van den Berg). In 2003 she she joined the intensive care staff at the VU Medical Center, Amsterdam. In 2008 she passed the European examination Transesophageale Echocardiography. In 2010 she will join the intensive care staff at the Flevohospital in Almere.
