

Table of contents

- Chapter 1: General introduction
- Chapter 2: Lymph node stromal cells and dendritic cells synergize for the efficient induction of gut-homing receptors on T cells.
- Chapter 3: Cutting edge: instructive role of peripheral tissue cells in the imprinting of T cell homing receptor patterns.
- Chapter 4: Expression of RALDH enzymes in dendritic cells and stromal cells of gut draining lymph nodes is controlled by dietary vitamin A.
- Chapter 5: Levels of vitamin A metabolism correlate with mucosal immune function.
- Chapter 6: Levels of vitamin A metabolism correlate with colitis severity.
- Chapter 7: Retinoic acid promotes lymphoid tissue inducer cell differentiation during embryonic lymph node development.
- Chapter 8: General discussion
- Chapter 9: Dutch summary - Nederlandse samenvatting
