

Table of contents

Chapter	page
1. General introduction.....	9
2. Study design and data collection.....	29
PART 1 Heritability estimates of β -cell function	
3. The heritability of HbA1c and fasting blood glucose in different measurement settings.....	45
4. The heritability of β -cell function parameters in a mixed meal test design.....	61
5. Genetic influences on the insulin response of the β -cell to different secretagogues.....	83
PART 2 Genetic variants and β -cell function	
6. A Combined risk allele score of eight type 2 diabetes genes is associated with reduced first phase glucose stimulated insulin secretion during hyperglycaemic clamps.....	105
7. Gene variants in the novel type 2 diabetes loci <i>CDC123/CAMK1D</i> , <i>THADA</i> , <i>ADAMTS9</i> , <i>BCL11A</i> , and <i>MTNR1B</i> affect different aspects of pancreatic β -cell function.....	129
8. Summary and conclusions.....	153
Nederlandse samenvatting.....	163
Publication list.....	171
Dankwoord.....	175
Curriculum vitae.....	179
