Road not taken

Two roads diverged in a yellow wood,
And sorry I could not travel both
And be one traveler, long I stood
And looked down one as far as I could
To where it bent in the undergrowth;

Then took the other, as just as fair,
And having perhaps the better claim
Because it was grassy and wanted wear,
Though as for that the passing there
Had worn them really about the same,

And both that morning equally lay
In leaves no step had trodden black.
Oh, I kept the first for another day!
Yet knowing how way leads on to way
I doubted if I should ever come back.

I shall be telling this with a sigh
Somewhere ages and ages hence:
Two roads diverged in a wood, and I,
I took the one less traveled by,
And that has made all the difference.

Robert Frost

My journey on the road of research as an AIO for four years was an amalgamation of good and difficult times. However this journey wouldn't have been complete without the support and guidance from my colleagues, friends and family.

First and foremost I would like to extend my gratitude to my promoter prof.dr. Enno C.I. Veerman for his guidance, immense patience, knowledge, thought provoking questions and

Acknowledgement

critical analysis that proved to be guiding light in my four years of research. His feedbacks helped me to get clarity in the planning and execution of my experiments.

I am grateful to my copromoters' Floris and Henk. I thank Floris for his positive attitude, inventive ideas, enthusiasm, good sense of humor and optimism. I am also thankful to Henk for his immense help with statistics, prompt valuable feedback with manuscript writing, energetic and enthusiastic nature, sharp thinking and his hard working nature was an inspiration to me.

When it comes to peptides Kamran comes to my mind. He being the "genie" in making peptides, without his help most of my research work with peptides wouldn't have been possible. I am grateful for his help, teaching me different lab techniques and overall involvement in my project. He was approachable and always made himself available to fix problems pertaining to experiments or the lab equipments. I enjoyed the discussions and the common opinions we shared about the world at large.

Petra - a gentle, warm, friendly, down to earth and understanding soul in our group. She taught and helped me with ELISA experiments. I was happy to have her company during the long hours of work in our lab during which we also had interesting conversation about research or life in general and always got sound advice from her. Thank you Petra, for lending ears to my problems with wise and mature temperament. This helped me to move on, solve the problems and face the challenges.

I thank Toon for accompanying me to the PER/IADR congress at Helsinki and also for the help with the hydrophobicity experiments. He being a widely travelled and well informed person, I've had engaging conversation on various topics ranging from culture, food, movies, science, sports etc.

Marianne, I thank you for the generous help with my experiments and for being involved in my project. I always looked upon you for your industrious nature, commitment to work and the responsibility you took to keep the lab well organized. I immensely enjoyed my first lab outing with our group to Haarlem which was organized by you.

I acknowledge Jan for his advice and creative ideas, Wim for the informative research oriented discussions and guidance and Margreet for her funny and cheerful demeanour.

I am immensely grateful to my wonderful AIO colleagues - Heinze, Tjitske, Irene, Sabrina, Mireille, Silvie, Andrei, Sanne (though you are not an AIO I felt like that you are a part of us) and the guests we had from Thailand, Aek and Pareena. We had lots of fun and frolic together at outings to Amsterdam, Zwolle and Leeuwarden. Heinze I will remember you for your crazy jokes and the funny chats that gave me hearty laughs; Tjitske for her caring, supportive and

good organizing abilities; Irene for her friendly, sweet and understanding nature; Sabrina for her cheerful, enthusiastic, helpful and positive vibes; Mireille, since your work desk has been shifted to the same floor as ours, since then we have had more interactions and acquaintance; Silvie for the wonderful cakes and taarts you got for us everytime time you visited ACTA; Andrei for the informative conversation about science and his personal experience with travelling to different countries; Sanne for her friendly nature and engaging conversations we had about work, weather, vacations and about the things happening in our lives; Aek for providing useful manuscripts and protocols for confocal microscopy and Pareena for her kind, friendly and jovial temperament. I wish you all the best with you work and pursuit with your goals and dreams in future.

I extend my gratitude towards prof.dr. Wim Crielaard for introducing me to ACTA and for giving me an opportunity to work in his lab as a volunteer.

From the Oral microbiology lab I am thankful to Dongmei and Michel for their help, guidance and for providing me with the bacterial strains. I am also grateful to Rob Exterkate for his help with the active attachment model.

The confocal microscopy studies would not have been possible without the genuine help from Cor, Ton and Bastiaan. I am grateful to them for their timely help and patience in teaching me to work with confocal microscopy.

The acknowledgement would not be complete without the mention of the STW users' committee members. The members include dr. Norbert Huber (from GABA), prof.dr. Arjan Vissink, prof.dr. Esther Middelkoop, dr. Bouke Boekema and dr. Henry van der Valk (from STW) for their active involvement in the progress of the project and for the valuable suggestions they gave me from time to time.

I would like to thank Martijn Steenbergen for the helping me with the administrative work of my promotion and also prof. dr. Vincent Everts for organizing the yearly Ph.D. progress meetings which helped me to plan and organize my research work.

Last but not the least my stay and work in The Netherlands wouldn't have been possible without the constant support and help from my loving husband Abhishek and my family members which include my parents, brothers, sisters-in-law, parents-in-law and brother-in-law. Though they were not here with me but I knew that they always believed in me and took pride in what I did. Without their love, support and blessings I wouldn't have been able to fulfill my aspirations and dreams.
