

TABLE OF CONTENTS

	List of abbreviations	7
Chapter 1	General introduction	11
Chapter 2	Two-way communication between the metabolic and cell cycle machineries: the molecular basis	31
Chapter 3	Metabolic alterations in oncogene-induced senescence	55
Chapter 4	A critical role for the mitochondrial gatekeeper pyruvate dehydrogenase in oncogene-induced senescence	71
Chapter 5	Near-genomewide RNAi screening for regulators of BRAF ^{V600E} -induced senescence identifies <i>RASEF</i> , a gene epigenetically silenced in melanoma	95
Chapter 6	Phosphoproteome dynamics in onset and maintenance of oncogene-induced senescence	117
Chapter 7	Signal transduction reaction monitoring deciphers site-specific PI3K-mTOR/MAPK pathway dynamics	143
Chapter 8	General discussion and perspective	161
Addendum	Summary	175
	Samenvatting	177
	Curriculum vitae	179
	List of publications	180
	PhD portfolio	181
	Acknowledgements	183
