

## TABLE OF CONTENTS

1	General introduction	9
<b>Part I</b>	<b>Renal function in children (with cancer)</b>	
2	Nierfunctie bij kinderen: meten, schatten, nieuwe markers of toch creatinine?	21
3	Height-independent estimation of GFR in children: an alternative for the Schwartz equation	31
4	Generation of a new cystatin c-based estimating equation for glomerular filtration rate by use of seven assays standardized to the international calibrator	43
5	Cystatin C more accurately detects mildly impaired renal function than creatinine in children receiving treatment for malignancy	67
6	Diversity in renal function monitoring and dose modifications during treatment for childhood cancer: a call for standardization	79
<b>Part II</b>	<b>Carboplatin dosing, pharmacokinetics and dynamics</b>	
7	Carboplatin dosing in children using estimated glomerular filtration rate: equation matters	99
8	A simple formula based on cystatin C for individual carboplatin dosing in children	113
9	Failure to correct for renal function results in highly imprecise carboplatin exposure in children	125
10	General discussion	133
11	Summary	147
	Nederlandse samenvatting voor niet-ingewijden	153
	References	157
	Curriculum vitae	173
	Publications	177
	Dankwoord	181
