

CONTENTS

Chapter 1	Introduction	7
PART I Visualization of subclinical synovitis in rheumatoid arthritis		
Chapter 2	Present role of positron emission tomography in diagnosis and monitoring of peripheral inflammatory arthritis: a systematic review. <i>Arthritis Care Res 2014; 66:120-130</i>	20
Chapter 3	Macrophage positron emission tomography imaging as a biomarker for preclinical rheumatoid arthritis: findings of a prospective pilot study. <i>Arthritis Rheum 2012;64:62-66</i>	46
Chapter 4	Three-year clinical outcome following baseline magnetic resonance imaging in anti-citrullinated protein antibody-positive arthralgia patients: an exploratory study. <i>Arthritis Rheumatol 2014;66:2909-10</i>	58
Chapter 5	Detection of subclinical synovitis in macrophage targeting and positron emission tomography in patients with rheumatoid arthritis without clinical arthritis. <i>J Rheumatol 2014; 41:2145-52</i>	71
Chapter 6	Subclinical synovitis detected by macrophage PET, but not MRI, is related to short-term flare of clinical disease activity in early RA patients <i>Submitted for publication</i>	89
Part II Novel macrophage-targeting PET tracers		
Chapter 7	Promising potential of new generation translocator protein tracers providing enhanced contrast of arthritis imaging by positron emission tomography in a rat model of arthritis <i>Arthritis Res Ther 2014;16:R70</i>	103
Chapter 8	Evaluation of the novel folate receptor ligand [¹⁸ F]fluoro-PEG-folate for macrophage targeting in a rat model of arthritis <i>Arthritis Res Ther 2013,15:R37</i>	126
Chapter 9	Discussion and future perspectives	150
	Summary	157
	Samenvatting	160
	List of publications	164
	Dankwoord	165
	Curriculum vitae	169
