

## TABLE OF CONTENTS

Chapter 1	General introduction and outline of the thesis	9
Chapter 2	Effects of GLP-1 on appetite and body weight: focus on the central nervous system	25
Chapter 3	Decreased hypothalamic glucagon-like peptide-1 receptor expression in type 2 diabetes patients	49
Chapter 4	Endogenous GLP-1 mediates postprandial reductions in activation in central reward and satiety areas in patients with type 2 diabetes	65
Chapter 5	Liraglutide reduces CNS activation in response to visual food cues only after short-term treatment in patients with type 2 diabetes	83
Chapter 6	Endogenous GLP-1 and GLP-1 analogue alter CNS responses to palatable food consumption	99
Chapter 7	Elevated postoperative endogenous GLP-1 levels mediate effects of Roux-en-Y gastric bypass on neural responsivity to food cues	119
Chapter 8	Decreased cerebral blood flow in T2DM patients is not improved by treatment with liraglutide	137
Chapter 9	Summary, general discussion & future perspectives	149
Chapter 10	Dutch Summary	173
Addendum	List of publications	181
	Co - author affiliations	187
	Dankwoord/Acknowledgements	193
	Biography	201
