

**Hemodiafiltration, vascular damage and protein-energy wasting
in patients with end-stage kidney disease**

Camiel de Roij van Zijdwijn

The CONvective TRANsport STudy was financially supported by a grant from the Dutch Kidney Foundation (Nierstichting Nederland, grant C02.2019) and unrestricted grants from Fresenius Medical Care (The Netherlands) and Gambro Lundia AB, Sweden. Additional support was received from the Dr. E.E. Twiss Fund, Roche Netherlands, the International Society of Nephrology/Baxter Extramural Grant Program, and the Dutch organization for Health Research and Development (ZonMW, grant 17088.2802). The magnesium study was supported by a grant from Fresenius Medical Care Deutschland GmbH, Bad Homburg, Germany. The feasibility study was supported by a grant from Fresenius Medical Care Nederland B.V.

Financial support by the Dutch Heart Foundation and the Dutch Kidney Foundation for the publication of this thesis is gratefully acknowledged. Publication of this thesis was financially supported by Fresenius Medical Care Nederland B.V., Baxter B.V., B. Braun Medical B.V., ChipSoft B.V., ABN AMRO N.V. and Nipro Europe N.V.
