

CONTENTS

CHAPTER ONE	General introduction and outline of the thesis	7
PART I	THE COMPOSITION OF ENTERAL NUTRITION INFLUENCES THE DIGESTION AND ABSORPTION OF NUTRIENTS	
CHAPTER TWO	Introduction PART I	15
CHAPTER THREE	Gastrointestinal obstruction by solidification of enteral nutrition: a result of impaired digestion in critically ill patients	23
CHAPTER FOUR	The effect of fibers on coagulation of casein-based enteral nutrition in an artificial gastric digestion model	37
CHAPTER FIVE	Jejunal casein feeding is followed by more rapid protein digestion and amino acid absorption when compared with gastric feeding in healthy young men	53
PART II	FOOD INTAKE INFLUENCES ENDOCRINE RESPONSES IN THE GUT	
CHAPTER SIX	Introduction PART II	73
CHAPTER SEVEN	The role of gastrointestinal hormones in the treatment of delayed gastric emptying in critically ill patients	93
CHAPTER EIGHT	Jejunal feeding is followed by a greater rise in plasma CCK, PYY, GLP-1 and GLP-2 concentrations when compared with gastric feeding in vivo in humans; a randomized trial	113
CHAPTER NINE	Preservation of the gut by preoperative carbohydrate loading improves postoperative food intake	131
CHAPTER TEN	Discussion and future perspectives	145
CHAPTER ELEVEN	Summary	154
	Samenvatting	157
	Curriculum Vitae	160
	List of publications	161
	Dankwoord	166
