Chapter 1	General Introduction	7
Chapter 2	Predicting the Predictors	23
2.1	Patterns of enhancing lesion evolution in Multiple Sclerosis are uniform within patients	25
2.2	Determinants of cerebral atrophy rate at the time of diagnosis of Multiple Sclerosis	41
Chapter 3	Follow-up Studies	53
3.1	Infratentorial lesions predict long-term disability in patients with initial findings suggestive of Multiple Sclerosis	55
3.2	Predicting short-term disability progression in early MS: added value of MRI parameters	69
3.3	MRI Predictors for disability at 5 years after the diagnosis of MS	89
3.4	Association between MRI parameters and the MS severity scale: a 12 year follow-up study	105
Chapter 4	General Discussion, Summary and Future Perspectives	119
Chapter 5	Nederlandse Samenvatting	137
	Curriculum vitae	145
	Dankwoord	147
