

CONTENTS

Chapter 1:	9
Introduction	
Chapter 2:	29
Dysphagia caused by retropharyngeal masses originating from the cervical spine	
<i>Chapter 2A: Anterior Cervical Osteophytes resulting in severe Dysphagia and Aspiration: Report of 2 cases and literature review</i>	
<i>Chapter 2B: Multiple cervical anterior meningoceles in a patient with neurofibromatosis type 1 causing dysphagia and dyspnea</i>	
Chapter 3:	45
Endoscopic CO ₂ -laser Zenker's diverticulotomy revisited	
Chapter 4:	59
Long-term results of External Upper Esophageal Sphincter Myotomy for Oropharyngeal Dysphagia	
Chapter 5:	75
Long-term results of Laryngeal Suspension and Upper Esophageal Sphincter Myotomy as treatment of life-threatening aspiration	
Chapter 6:	89
Strictures and fibrosis of the larynx and pharynx	
<i>Chapter 6A: CO₂-laser Pharyngoplasty for Severe Oropharyngeal Stenosis after Primary Irradiation</i>	
<i>Chapter 6B: Anterograde-Retrograde rendezvous Dilation for radiation induced Complete UES Stenosis: a review of the literature and case report</i>	
<i>Chapter 6C: Laryngo-Tracheal Separation with Voice Prosthesis in Dysfunctional Larynx and Complete Esophageal Stricture</i>	
Chapter 7:	117
When not to perform surgery	
Chapter 8:	125
Discussion	
Chapter 9:	133
Summary	
Chapter 10:	141
Samenvatting	
Chapter 11:	151
