

Chapter 1	Introduction	9
Chapter 2	Genetics	
2.1	No major association of APOE genotype with disease characteristics and MRI findings in multiple sclerosis.	21
2.2	Association of APOE polymorphisms with disease severity in MS is limited to women.	33
2.3	APOE epsilon variation in multiple sclerosis susceptibility and disease severity: some answers.	39
Chapter 3	Immunopathology	
3.1	No association of CSF apoE concentration with clinical and MRI characteristics in MS	63
3.2	Mediators of apoptosis Fas and FasL predict disability progression in multiple sclerosis over a period of 10 years.	73
Chapter 4	MRI	
4.1	Classification of multiple sclerosis patients by latent class analysis of magnetic resonance imaging characteristics.	85
4.2	At the heart of primary progressive multiple sclerosis: three cases with diffuse MRI abnormalities only.	97
Chapter 5	Summary, discussion and future perspectives	105
	Samenvatting	121
	Dankwoord	127
