

# Contents

<b>Chapter 1:</b>	General introduction and outline of the thesis .....	9
<b>Chapter 2:</b>	PKC $\alpha$ and PKC $\epsilon$ phosphorylation of troponin and myosin binding protein C reduce Ca <sup>2+</sup> -sensitivity in human myocardium .....	23
<b>Chapter 3:</b>	Protein kinase C $\alpha$ -mediated phosphorylation of cardiac troponin reduces maximal force and increases Ca <sup>2+</sup> -sensitivity in human cardiomyocytes.....	43
<b>Chapter 4:</b>	Effect of troponin I Ser23/24 phosphorylation on Ca <sup>2+</sup> -sensitivity in human myocardium depends on the phosphorylation background .....	63
<b>Chapter 5:</b>	Comparison of the contractile effects of PKA mediated phosphorylation and pseudo phosphorylation of cardiac troponin I in human cardiomyocytes.....	87
<b>Chapter 6:</b>	Conclusions & Future perspectives .....	103
<b>Chapter 7:</b>	Summary & Samenvatting.....	107
<b>Chapter 8:</b>	Bibliography .....	115
	List of publications .....	133
	Dankwoord.....	135
	Curriculum vitae.....	139
