

# CONTENTS

## **Chapter 1**

Cardiomyopathy and the sarcomere - General Introduction.....9

## **Chapter 2**

Myocardial adaptations in the failing heart: cause or consequence?.....21

## **Chapter 3**

A piece of the human heart: Variance of protein phosphorylation in left ventricular samples from end-stage primary cardiomyopathy patients.....27

## **Chapter 4**

Protein kinase A treatment unmasks differences in myofilament  $\text{Ca}^{2+}$ -sensitivity between human familial hypertrophic and dilated cardiomyopathy.....35

## **Chapter 5**

Cardiac myosin-binding protein C mutations and hypertrophic cardiomyopathy: haploinsufficiency, deranged phosphorylation and cardiomyocyte dysfunction.....53

## **Chapter 6**

Altered length-dependent activation independent of mutant protein in human hypertrophic cardiomyopathy.....73

## **Chapter 7**

Preserved cross-bridge kinetics in human hypertrophic cardiomyopathy patients with a *MYBPC3* mutation.....97

## **Chapter 8**

8.1 Summary, Conclusion and Future perspectives.....120

8.2 Nederlandse samenvatting en conclusie.....132

8.3 Vereenvoudigde samenvatting.....140

## **Chapter 9**

9.1 List of abbreviations.....146

9.2 Literature references.....148

## **Chapter 10**

10.1 List of publications.....168

10.2 Awards.....170

10.3 (Co)Author affiliations.....171

## **Chapter 11**

Acknowledgements/ Dankwoord.....173
